Promoting and protecting the health of the public and the environment

PUBLIC NOTICE

Notice # 13688-01

October 1, 2013

This notice is to inform the public that the S. C. Department of Health and Environmental Control (Agency) is taking public comments on a Corrective Action Plan (CAP). This CAP addresses the cleanup of soil and groundwater petroleum contamination at the facility listed below. The contamination was caused by petroleum products that were released from the underground storage tank systems at this facility. Based on current data, the petroleum release does not pose a threat to human health or the environment and the case will be closed. This proposed conditional closure is specifically for petroleum and petroleum products at the referenced facility. Assessment activities are ongoing for lead and arsenic.

FACILITY: Seaco Incorporated, 2700 William Tuller Drive, Columbia, SC

APPLICANT: Seaco Incorporated, 2700 William Tuller Drive, Columbia, SC 29205

SUMMARY OF CAP: Petroleum and petroleum byproducts naturally break down over time through chemical, physical, and biological processes. These processes are called natural attenuation. Based on 23 groundwater-sampling events conducted since 1992, the levels of petroleum remain below levels of concern. Therefore, the case associated with the petroleum will be closed.

PUBLIC COMMENT PERIOD DEADLINE: The deadline for submitting written comments is **5 PM October 31, 2013**. Any interested person(s) may submit written comments concerning the cleanup to the Project Manager listed below. Please bring this notice to the attention of persons whom you know will be interested in this matter. Where there is a sufficient degree of public interest, the Agency will hold a public hearing.
